1. Project and Developer Details

Company Lockers Pvt. Ltd. aims to digitize their products and chose LockedMe.com as their first project to start with. Developer is asked to develop a prototype of the application. The prototype of the application will be then presented to the relevant stakeholders for the budget approval.

- Specification document - Product's capabilities, appearance, and user interactions
- Number and duration of sprints required
- Setting up Git and GitHub account to store and track your enhancements of the prototype
- Java concepts being used in the project
- Data Structures where sorting and searching techniques are used.
- Generic features and three operations:
 - Retrieving the file names in an ascending order
 - Business-level operations:
 - Option to add a user specified file to the application
 - Option to delete a user specified file from the application
 - Option to search a user specified file from the application
 - Navigation option to close the current execution context and return to the main context
- Option to close the application

The goal of the company is to deliver a high-end quality product as early as possible.

Project development assigned to: Arsha R Unnithan

Full Stack Developer, Company Lockers Pvt. Ltd.
arsharunnithan@gmail.com

Development cycle: 2 Sprints

Tech stack used:

- Java
- Eclipse
- Git
- GitHub
- Scrum
- Search and Sort techniques: Stream, Set, Files, Collections, Iterator, List
- Core concepts used: I/O Streams, Exception handling, OOPs, Recursion, Sorting
- Microsoft word used for documentation. Document shared in pdf format.

2. Sprints planned and the tasks achieved in them

Agile Project Management

Project Duration	2 Weeks (15 working days)
Number of Sprints	2
Total number of product backlog items	12

2.1 Project planning details

Sprint	Start date	End date	Product Backlog Item ID
Week 1	01/27/2023	02/02/2023	1.1, 1.1.2, 1.1.3, 1.2, 1.3, 1.3.1, 1.3.2
Week 2	02/03/2023	02/09/2023	1.3.2.1, 1.3.2.2, 1.3.2.3, 1.3.2.4, 1.3.3

2.2 Product Backlog/User Stories

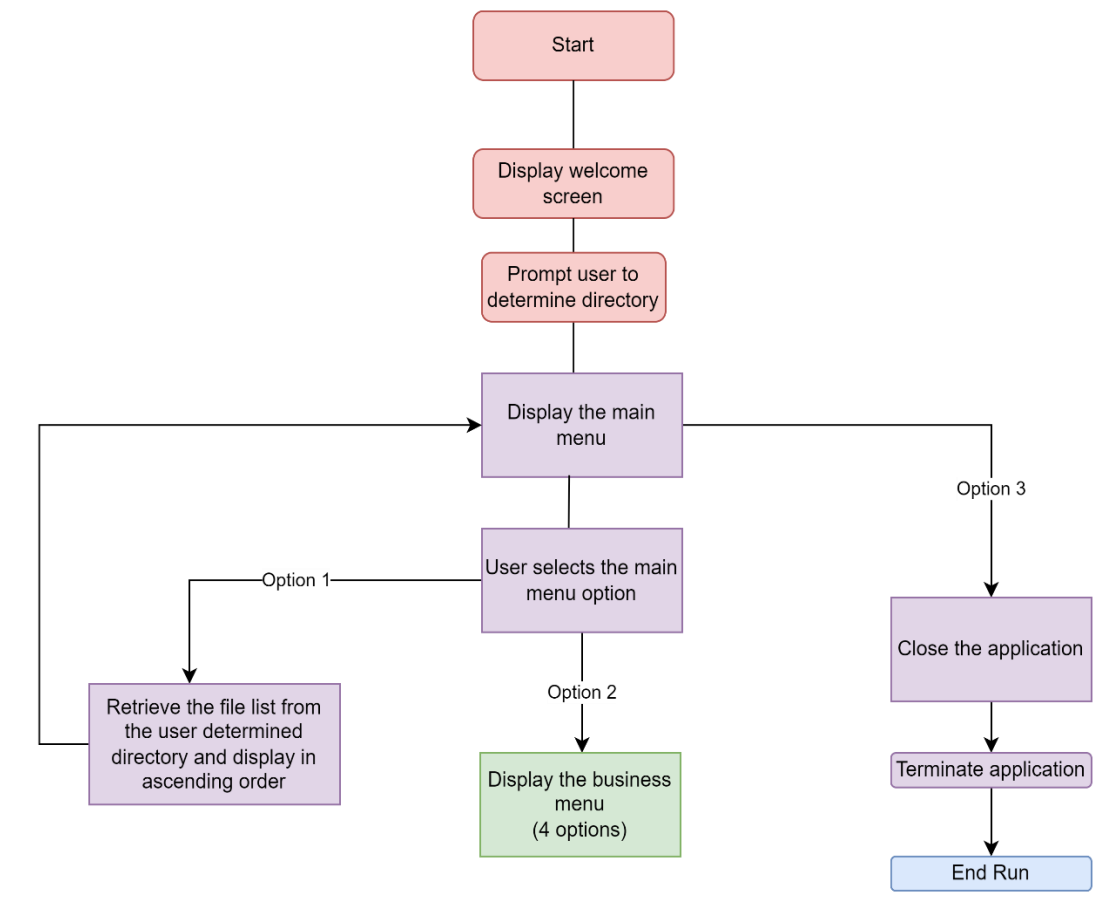

ID	User Story	Story Points	Assigned Sprint
1.1	The LockedMe.com application should display the welcome screen.	1	Sprint 1
1.1.2	Application name and developer details should be displayed.	-	Sprint 1
1.1.3	Features to accept the user input to select one of the options should be listed.	-	Sprint 1

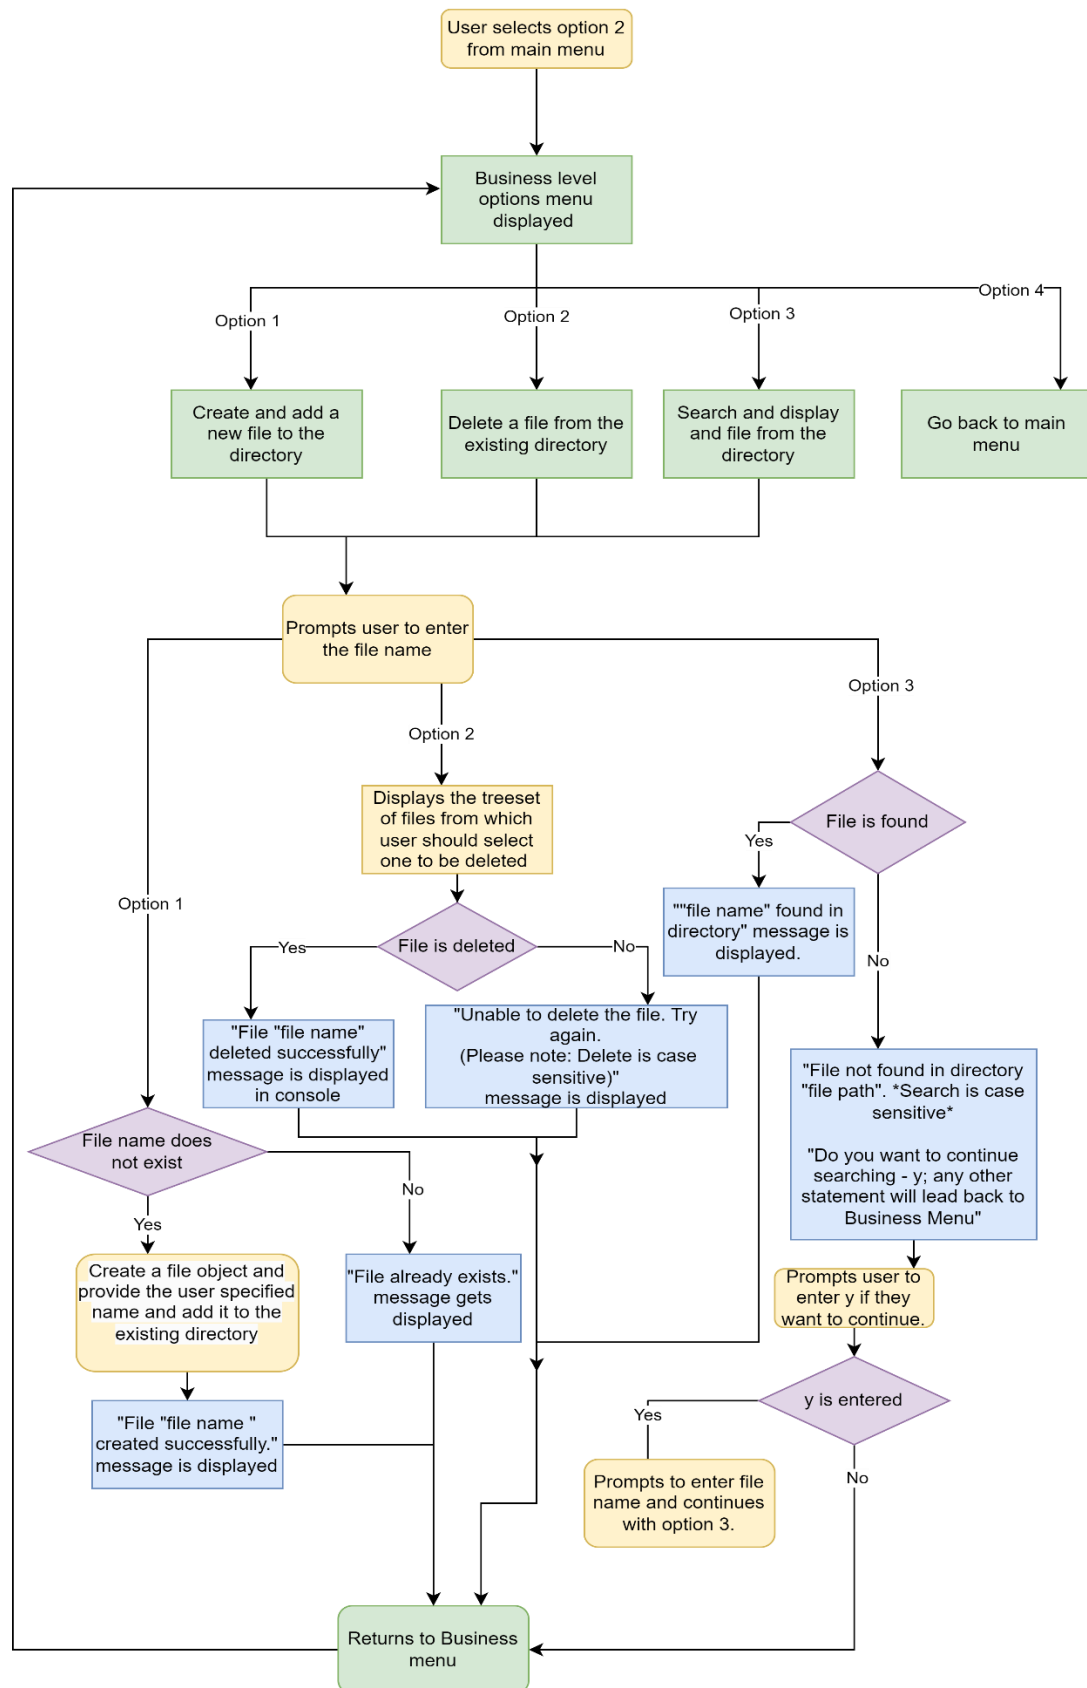

1.2	Ask user to specify the target directory for file operations. It cannot be changed further.	1	Sprint 1
1.3	A numerical menu of three operations should be considered as the main menu.	1	Sprint 1
1.3.1	First menu option should retrieve the file names and sort them in an ascending order.	2	Sprint 1
1.3.2	Second main menu operation is considered Business level operations with four option in it.	2	Sprint 1
1.3.2.1	First option to add a user specified file to the directory(Case sensitivity could be ignored)	2	Sprint 2
	<ul style="list-style-type: none"> Ask user a file name and provide it to the new file being added. 	-	
	<ul style="list-style-type: none"> Return appropriate messages 	-	
1.3.2.2	Second option of Business menu to	2	Sprint 2

	delete a user specified file from the existing directory.		
	<ul style="list-style-type: none"> User should be displayed with a list of existing files in the directory from which they can select which one to delete. 	-	
	<ul style="list-style-type: none"> Delete the user specified file and Return appropriate messages. (Delete function is case sensitive)	-	
1.3.2.3	Third option of Business menu is to search and display a user specified file from the existing directory.	2	Sprint 2
	<ul style="list-style-type: none"> Search and display the file and return appropriate messages. 	-	
	<ul style="list-style-type: none"> User should be given a second chance is the 	-	

	file is not found.		
1.3.2.4	Fourth business menu option is to go back to the main menu.	1	Sprint 2
1.3.3	Third main menu option should close the application	1	Sprint 2

3. Algorithms/Flowchart of the application

```

Conclusion:

Above application is just a prototype and it could be enhanced in various ways since lacks so much other features like advanced search filtering, robust file conversion tools, cloud integration, security features, automatic file conversion and versioning.

As for USPs, usability, robustness, performance, scalability, flexibility and reliability could be valid points.
